

DYLAN CORMIER

MAINTENANCE MECHANIC I & LOGISTICS SUPERVISOR

Vancouver, British Columbia

dylan.cormier95@gmail.com

(604) 319-9312

Dynamic industrial mechanic & logistics/moving industry supervisor with a passion for consistently learning and pursuing a career as a Millwright. Equipped with post-secondary education from the Kwantlen Polytechnic Millwright/Industrial Mechanic Foundations program, along with my most recent experience as a Maintenance Mechanic I with Metro Vancouver Region's Wastewater Treatment District, I possess the capacity to adapt and learn quickly in an ever-changing industrial environment. With 14+ years of total work experience, I've developed exceptional customer service skills, fostered strong teamwork abilities, consistently demonstrated initiative, and honed my time management and learning capabilities. This foundation positions me to excel as a mechanic.

SKILLS

5-ton Truck Driving Experience	Class 1,3,4,5,7 Forklift Certification	Class 5 License With 12 Years Exp
Fall Arrest and Working at Heights	Time Management & Organization	Teamwork & Achieving Tight Deadlines

EXPERIENCE

Maintenance Mechanic I | Metro Vancouver (Contract - Temporary, FT), West Vancouver, BC *June 2023 - Present*

Assist Industrial Mechanics and other tradespeople at Lions Gate Wastewater Treatment Facility. Day-to-day duties include pre-use inspections, completing assigned and outstanding work orders, including correctives during downtime, as well as communicating required lock-outs with Operations. This role is very independent and I am expected to take initiative and manage my own time to get projects completed. Just a handful of the larger projects I have been a part of are:

- Assisting in the inspection of Waukesha natural gas compression engines by using a borescope and physical diagnosis - Resulting in the installation of a new crankshaft and top-end rebuild, Including rocker assembly.
- Full Waukesha engine disassembly and engine block removal; swapped over camshaft, cam gear, oil lines and other ancillary components before hoisting and installing back in position.
- Oil changes and timing adjustments on natural gas compression engines are part of my frequent preventative maintenance duties with a journeyman.
- Full retrofitting and installation of new 4" and 6" diameter piping systems in an exterior process building. Assisted contracted welder with removing, rigging and reinstalling of new vertical and horizontal pipe systems and valves running from the exterior into the building and existing structure.
- Completed a rebuild of Vogelsang rotary lobe pump with minimal assistance; from cleaning/prepping of chassis to full replacement of bearings, mechanical seals, shaft installation, sealing of the wet end and reinstallation of lobes.
- Completed a lobe replacement on the rotary lobe pump in place in the field
- Hoffman Centrifugal Blower bearing replacement and realignment to Motor with Pruftechnik Optalign
- Monthly Vibration and Oil/Viscosity Analysis on critical equipment within the treatment process. Use of SKF intrinsically safe devices for data capture into the SKF Pulse application for trend monitoring. Oil samples were captured and sent to Fluid Life for testing.

Moving Supervisor/Driver | EzMoov (PT), Vancouver, BC *April 2019 - Present*

Started working full-time as a helper/swamper in 2018 and earned the opportunity to lead my own team. Teams consisted of 2-6 people depending on the size of the move and the number of required trucks. Although I have had changes of employment over the last 5 years, I continue to work here part-time.

- Assisted large-scale businesses in furniture and e-commerce, moving whole warehouses of inventory. I would be the direct contact on-site between the client and the moving company resulting in acquiring conflict mitigation and project management capabilities.
- Moved clients across many demographics from large multi-million dollar estates and mansions to elderly people in retirement communities. This resulted in great communication skills and the ability to adapt quickly to the environment around me.
- Trained new employees in best practices of moving and customer service.

Warehouse Driver & Relief Shipper/Receiver | *Fresh Prep Foods Inc., Vancouver, BC*

Feb 2022 - Jul 2022

Hybrid role consisting of driving a 27ft 5-ton box truck between warehouses and working as a shipper/receiver. Use of Sit Down Counterbalance forklift and power pallet jacks to move product. Driver was an independent role with required contact with all stakeholders across every department via Slack mobile application.

- In charge of materials movement within all departments and facilities.
- Learned Fishbowl inventory management systems for receiving goods from suppliers and shipping of materials between facilities.
- Optimized product utilization through inventory organization and use of FIFO practices.

Press Feeder/Catcher | *Graphic Packaging International, Cobourg ON*

Jan 2019 - Nov 2019

Worked in a fast and high-volume production environment that printed paper products for large consumer brands such as Kraft, Post Brands, Tim Hortons and Procter & Gamble. Assisted the press operators in finding discrepancies within the product/print runs and stacked finished product onto pallets.

- Given the responsibilities over time to clean ink applicators, printing cells, machine parts and other general duties.
- Started learning the mixing of inks for certain printing applications and dismantling of gears for different printing speeds.

Front Desk/Night Auditor – | *Deer Lodge, Lake Louise AB*

Dec 2014 - April 2015

Worked as a relief front desk clerk 2 days per week and night auditor at a 70-room hotel in Lake Louise, Alberta. Used my ability to quickly learn and absorb numbers and data to efficiently complete the nightly auditing of the hotel and restaurant finances.

- Checked in/out guests daily and assisted in any travel requests they may have.
- Completed efficient nightly audits of the hotel and connected restaurant finances while being the only employee maintaining the front desk overnight.

Sales & Merchandising | *Sports Traders, Victoria BC*

Jan 2014 - Jul 2014

Main salesperson for 2 departments - fitness/gym equipment and soccer. During baseball season I led the merchandising of the whole department and helped exceed daily targets.

- Helped customers find a variety of sports equipment from running shoes to field hockey sticks and disc golf accessories.
- Assisted in various new merchandising and visual marketing campaigns with minimal supervision.

Cashier | *Walmart, Cobourg ON*

Apr 2011 - Jun 2012

Was a top-performing cashier with the highest number of items scanned per hour on my daily shift. Many customers would line up at my belted cash due to the efficiency I had in both the packing of items and also memorization of produce codes to streamline the checkout process.

- Assisted with proprietary credit card payments through the POS systems.
- Helped in conflict resolution and general customer service
- High-volume cash handling experience

EDUCATION

Introduction to Welding - British Columbia Institute of Technology

Course included hands-on experience of over 35 hours with oxyacetylene, MIG, TIG, and stick welding as well as appropriate safety procedures
